

TR4580-35-PI-C

Arris-Aurora® TR4580-35-PI Compatible TAA 2.5GBase-DWDM SFP Transceiver C-Band 100GHz (SMF, 1549.32nm, 120km, LC, DOM, -40 to 85C)

Features:

- SFF-8432 and SFF-8472 Compliance
- Duplex LC Connector
- Single-mode Fiber
- Industrial Temperature -40 to 85 Celsius
- Hot Pluggable
- Metal with Lower EMI
- Excellent ESD Protection
- RoHS Compliant and Lead Free

Applications:

- Gigabit Ethernet over DWDM
- 2x Fibre Channel
- Access, Metro and Enterprise

Product Description

This Arris-Aurora® TR4580-35-PI compatible SFP transceiver provides 2.5GBase-DWDM throughput up to 120km over single-mode fiber (SMF) using a wavelength of 1549.32nm via an LC connector. It is guaranteed to be 100% compatible with the equivalent Arris-Aurora® transceiver. This easy to install, hot swappable transceiver has been programmed, uniquely serialized and data-traffic and application tested to ensure that it will initialize and perform identically. Digital optical monitoring (DOM) support is also present to allow access to real-time operating parameters. This transceiver is Trade Agreements Act (TAA) compliant. We stand behind the quality of our products and proudly offer a limited lifetime warranty.

ProLabs' transceivers are RoHS compliant and lead-free.

TAA refers to the Trade Agreements Act (19 U.S.C. & 2501-2581), which is intended to foster fair and open international trade. TAA requires that the U.S. Government may acquire only "U.S. – made or designated country end products."

Regulatory Compliance

- ESD to the Electrical PINs: compatible with MIL-STD-883E Method 3015.4
- ESD to the LC Receptacle: compatible with IEC 61000-4-3
- EMI/EMC compatible with FCC Part 15 Subpart B Rules, EN55022:2010
- Laser Eye Safety compatible with FDA 21CFR, EN60950-1& EN (IEC) 60825-1,2
- RoHS compliant with EU RoHS 2.0 directive 2015/863/EU

Wavelength Guide (100GHz ITU-T Channel)

| ITU Channel | Frequency (THZ) | Center Wavelength (nm) |
|-------------|-----------------|------------------------|
| 61 | 196.1 | 1528.77 |
| 60 | 196.0 | 1529.55 |
| 59 | 195.9 | 1530.33 |

Notes

1. Class 1 Product
2. Measured with PRBS 2²³-1 test pattern, 2.48832Gb/s, EX=8.2dB, BER<10⁻¹².

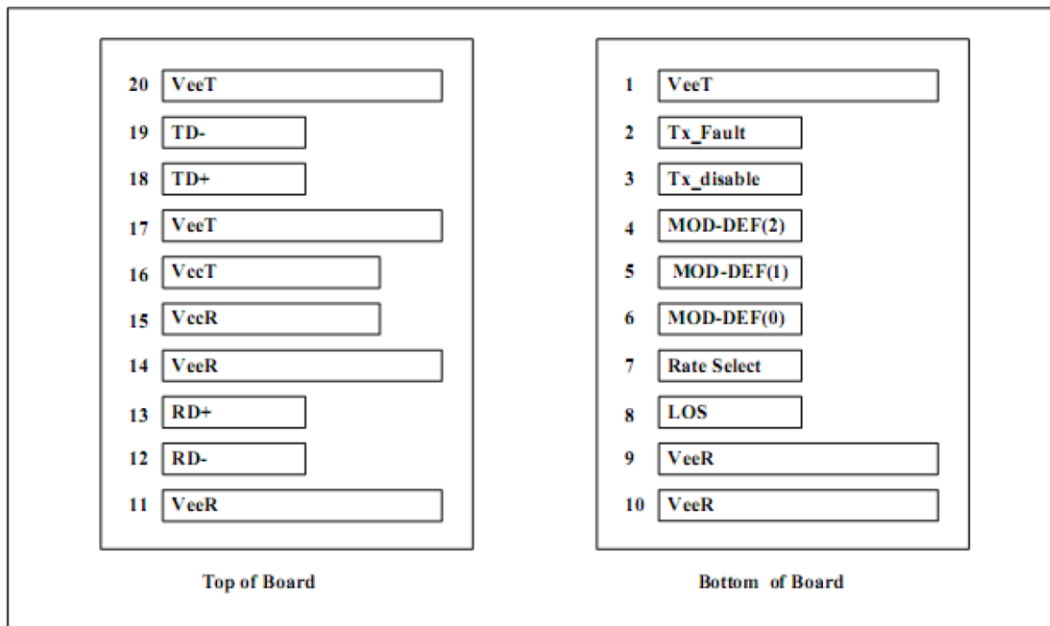

Pin Descriptions

| Pin | Symbol | Name/Descriptions | Ref. |
|-----|-------------|--|------|
| 1 | VeeT | Transmitter Ground (Common with Receiver Ground) | |
| 2 | TX Fault | Transmitter Fault Indication | 1 |
| 3 | TX Disable | Transmitter Disable-Module. Laser output disables on high or open. | 2 |
| 4 | MOD_DEF (2) | Module Definition 2. Two wire serial ID interface. | 3 |
| 5 | MOD_DEF (1) | Module Definition 1. Two wire serial ID interface. | 3 |
| 6 | MOD_DEF (0) | Module Definition 0. Two wire serial ID interface. | 3 |
| 7 | Rate Select | No connection required. | |
| 8 | LOS | Loss of Signal indication. Logic 0 indicates normal operation. | 4 |
| 9 | VeeR | Receiver Ground (Common with Transmitter Ground) | |
| 10 | VeeR | Receiver Ground (Common with Transmitter Ground) | |
| 11 | VeeR | Receiver Ground (Common with Transmitter Ground) | |
| 12 | RD- | Receiver Inverted DATA out. AC Coupled. | 5 |
| 13 | RD+ | Receiver Non-inverted DATA out. AC Coupled. | 5 |
| 14 | VeeR | Receiver Ground (Common with Transmitter Ground) | |
| 15 | VccR | Receiver Power Supply +3.3 V \pm 5%. | 6 |
| 16 | VccT | Transmitter Power Supply +3.3 V \pm 5%. | 6 |
| 17 | VeeT | Transmitter Ground (Common with Receiver Ground) | |
| 18 | TD+ | Transmitter Non-Inverted DATA in. AC Coupled. | 7 |
| 19 | TD- | Transmitter Inverted DATA in. AC Coupled. | 7 |
| 20 | VeeT | Transmitter Ground (Common with Receiver Ground) | |

Notes:

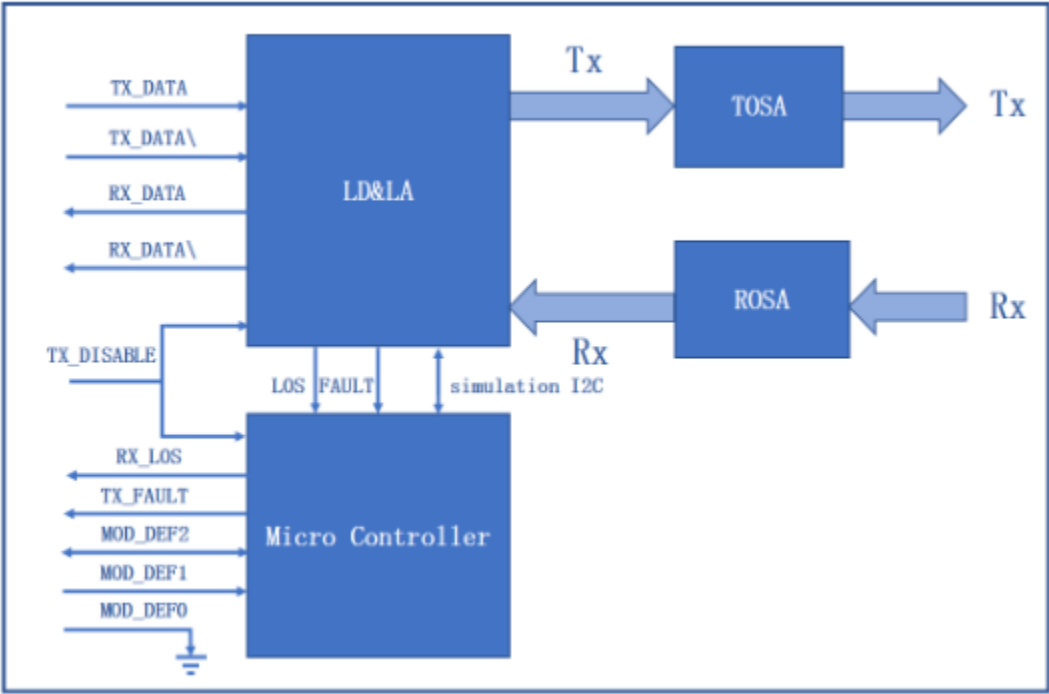

1. TX Fault is open collector/drain output, which should be pulled up externally with a 4.7K – 10K Ω resistor on the host board to supply <VccT+0.3V or VccR+0.3V. When high, this output indicates a laser fault of some kind. Low indicates normal operation. In the low state, the output will be pulled to <0.8V.
2. TX Disable input is used to shut down the laser output per the state table below. It is pulled up within the module with a 4.7 – 10K resistor. Low (0 – 0.8V): Transmitter on Between (0.8V and 2V): Undefined High (2.0 – VccT): Transmitter Disabled Open: Transmitter Disabled
3. Mod-Def 0, 1, 2. These are the module definition pins. They should be pulled up with a 4.7 - 10K resistor on the host board to supply less than VccT+0.3V or VccR+0.3V. Mod-Def 0, is grounded by the module to indicate that the module is present. Mod-Def 1 is clock line of two-wire serial interface for optional serial ID. Mod-Def 2 is data line of two-wire serial interface for optional serial ID.
4. LOS (Loss of signal) is an open collector/drain output, which should be pulled up externally with a

- 4.7 – 10K resistor on the host board to supply $<V_{ccT}+0.3V$ or $V_{ccR}+0.3V$. When high, this output indicates the received optical power is below the worst-case receiver sensitivity (as defined by the standard in use). Low indicates normal operation. In the low state, the output will be pulled to $<0.8V$.
5. RD-/+: These are the differential receiver outputs. They are AC coupled 100 Ω differential lines which should be terminated with 100 Ω differential at the user SERDES. The AC coupling is done inside the module and thus not required on the host board.
 6. VccR and VccT are the receiver and transmitter power supplies. They are defined as $3.3V \pm 5\%$ at the SFP connector pin. The in-rush current will typically be no more than 30mA above steady state supply current after 500ns.
 7. TD-/+: These are the differential transmitter inputs. They are AC coupled differential lines with 100 Ω differential termination inside the module. The AC coupling is done inside the module and is thus not required on host board.

EEPROM Information

EEPROM memory map specific data field description is as below:

Regulatory Compliance

| Feature | Standard | Performance |
|--|--|---|
| Electrostatic Discharge (ESD) to the Electrical Pins | MIL-STD-883E Method 3015.7 | Class 1 (>500 V) Isolation with the case |
| Electromagnetic Interference (EMI) | FCC Part 15 Class B | Compatible with standards |
| Laser Eye Safety | FDA 21CFR 1040.10 and 1040.11 EN60950, EN (IEC) 60825-1,2 | Compatible with Class 1 laser product. Compatible with TμV standards |
| Component Recognition | UL and CUL | UL file E317337 |
| Environmental | RoHS | RoHS6 |

About ProLabs

Our experience comes as standard; for over 15 years ProLabs has delivered optical connectivity solutions that give our customers freedom and choice through our ability to provide seamless interoperability. At the heart of our company is the ability to provide state-of-the-art optical transport and connectivity solutions that are compatible with over 90 optical switching and transport platforms.

Complete Portfolio of Network Solutions

ProLabs is focused on innovations in optical transport and connectivity. The combination of our knowledge of optics and networking equipment enables ProLabs to be your single source for optical transport and connectivity solutions from 100Mb to 400G while providing innovative solutions that increase network efficiency. We provide the optical connectivity expertise that is compatible with and enhances your switching and transport equipment.

Trusted Partner

Customer service is our number one value. ProLabs has invested in people, labs and manufacturing capacity to ensure that you get immediate answers to your questions and compatible product when needed. With Engineering and Manufacturing offices in the U.K. and U.S. augmented by field offices throughout the U.S., U.K. and Asia, ProLabs is able to be our customers best advocate 24 hours a day.
